Know what your IT really costs and delivers

# IT Financial Management (ITFM)
with **CIO COCKPIT**

COCKPIT

Do you lack an overview of your cloud, SaaS and hardware costs? Do you want to know what all these services cost and what they actually contribute to your company's revenue? Do you want more transparency in your IT infrastructure? With CIO COCKPIT you can operate IT Financial Management. It provides you with a solution that collects, structures and visualises relevant information. This gives you a comprehensive overview of the status, costs and performance of your IT systems. Our solution also consolidates cloud costs, provides a visualised analysis and enables you to optimise your cloud costs. This allows you to save costs efficiently and always know what performance you can expect for your expenditure. This enables you not only to save costs, but also to reinvest smartly in more modern IT to further digitally transform your business models.

CIO COCKPIT provides key figures for the business value of IT

- **CIO COCKPIT** is an ITFM solution that creates a single point of truth for planning and managing your IT and cloud costs.

- **CIO COCKPIT** is easy to use and offers guided processes for cost evaluation and budget planning.

- **CIO COCKPIT** uses predefined roles to bring together people with and without budget responsibility from IT controlling, purchasing and business.

Best usability and clarity:
The integrated analyses allow users to keep track of all IT services, their status and the resulting measures.

CIO COCKPIT consolidates, automates and optimises

• CIO COCKPIT
shortens your budget planning process from several months to just a few weeks and immediately increases its quality.

• CIO COCKPIT
visualizes your business and service structures and offers automated import of cloud and SaaS costs.

• CIO COCKPIT
helps to optimize IT investments to accelerate digital transformation.

Three reasons for CIO COCKPIT

Record, visualise and communicate costs clearly
Take the IT financial management approach: knowing costs, planning costs, and optimising costs.

High degree of automation
Work in a time-saving and structured manner by spending less time on Excel and manual tasks.

Flexibly adaptable to individual requirements
Whether CFO, IT controller or CIO – tailor the solution to your specific role and methodology within the company.

It's all possible with CIO COCKPIT
